

**Glasses or contacts should be the last thing you have to worry about during this time. If you've lost, broken or damaged your eyewear due to Hurricane Florence, EyeMed Vision Care can help.**

Simply follow these steps to talk to a representative that understands the support available.

1. Call 866-652-0018 to talk to an EyeMed representative.
2. Agents will have policy-specific support, plus the ability to send (at no-cost) an emergency pair of replacement Adlens Adjustable Glasses, which will allow you to adjust for different distances and switch focus for reading, computer and distance. Or, if you prefer to order permanent replacement glasses or contacts, your EyeMed representative can provide free, expedited shipping from Glasses.com and ContactsDirect.com
3. For emergency, replacement Adlens Adjustables, be prepared to provide the address of your choice where they can be shipped – or whether you will instead pick them up from a designated local store.
4. That's it. A pair of Adlens Adjustable Glasses will be sent to you with free overnight shipping (must call by 2:30 pm for same-day processing).

EyeMed is also continuing to work with their network of local providers and with OneSight to provide additional resources and support.
